ABOUT DESERTSCAPE

We plant life into spaces that need lasting performance.

DesertScape Co is a Riyadh based landscape company built for complete outdoor project delivery.

The company focuses on the full landscape lifecycle. That includes site review, design support, procurement, construction, testing, handover, operation, and maintenance.

DesertScape is being built for clients who value clarity, project discipline, climate aware design, and dependable execution.

Saudi

Riyadh based and structured for Kingdom wide mobilization

End to End

Survey, design, supply, build, handover, operation, and maintenance

Climate Aware

Built around heat, water, soil, durability, and maintainability

Project Led

Focused delivery for owners, consultants, contractors, and private clients

POSITIONING

Premium landscape delivery with practical construction discipline.

Saudi Project Conditions

The approach is built around heat, water use, plant performance, material durability, logistics, safety, and long term maintainability.

Clear Scope Control

Services can be engaged as standalone scopes or connected into an end to end package depending on client requirements.

Design to Maintenance

The company links design intent, procurement choices, construction quality, and operational care into one lifecycle view.

Technical Office

Drawings, quantities, specifications, planning, submittals, documentation, and coordination are managed with project control.

Field Capability

In-house machinery, equipment, vehicles, logistics resources, tools, and site support assets support reliable delivery.

Vendor Network

Supplier, subcontractor, nursery, manufacturer, and specialist relationships support package quality and procurement options.

Outdoor environments must look refined on opening day and continue to perform after handover.

LIFECYCLE

From first site review to long term asset care.

DesertScape is organized around the full life of a landscape asset.

**Standalone**

Engage DesertScape for a single scope such as design, supply, construction, maintenance, irrigation, softscape, hardscape, lighting, or nursery services.

End to End

Engage DesertScape to connect the full delivery path from site review and design through supply, construction, handover, operation, and maintenance.

Flexible by Stage

The service model supports early concepts, tender support, construction execution, post handover care, or operational improvement of an existing landscape.

CORE SERVICES

A focused service structure for owners, consultants, contractors, government teams, and private clients.

Survey and Site Assessment

Site review, measurements, access study, constraints mapping, utilities awareness, existing asset inventory, and early delivery notes.

Landscape Design

Concept, schematic, detailed, and construction stage landscape design for refined outdoor environments in Saudi Arabia.

Supply and Procurement

Procurement support for plants, palms, trees, hardscape, irrigation, lighting, furniture, play, sports, and specialist landscape components.

Landscape Construction

Construction execution for softscape, hardscape, irrigation, lighting, water features, civil works, infrastructure, and public realm assets.

Operation and Maintenance

Preventive and corrective maintenance plans that protect landscape value through routine care, reporting, and performance management.

DELIVERY CONTROLS

Five controls keep the scope aligned from first review to long term care.

The process is intentionally simple: define the site, coordinate the design, control procurement, execute cleanly, then protect the asset after handover.

Each stage can stand alone or connect into a complete end to end landscape package.

Scope narrative

Technical notes or drawings

Material, plant, or system schedules

Procurement and budget inputs

Inspection, handover, and maintenance documentation

01 Survey and Site Assessment

Site visit, visual review, access, staging, drainage, soil, utilities, existing assets, risks, and phasing notes.

02 Landscape Design

Outdoor experience planning, planting, hardscape, irrigation, lighting, furniture, water features, tender inputs, quantities, and drawings.

03 Supply and Procurement

Supplier comparison, material and plant submittals, lead time planning, logistics, specification alignment, and budget control.

04 Landscape Construction

Mobilization, sequencing, civil and MEP interfaces, irrigation execution, quality, safety, testing, commissioning, and handover.

05 Operation and Maintenance

Preventive care, irrigation tuning, seasonal planting, pruning, pest control, plant health, inspections, reporting, and upgrades.

ELEMENTS

Coordinated systems, materials, and outdoor components.

Softscape

Trees, palms, shrubs, groundcovers, seasonal flowers, turf, soil improvement, mulch, gravel, and planting works.

Hardscape

Paving, stone, concrete, asphalt, walls, curbs, plazas, walkways, outdoor finishes, and public realm surfaces.

Irrigation

Drip, sprinkler, controls, pumps, tanks, filtration, drainage coordination, efficiency review, and maintenance.

Water Features

Fountains, water mirrors, cascades, ponds, pump rooms, filtration interfaces, testing, and commissioning.

Civil, MEP, and Infrastructure

Landscape related civil works, infrastructure, electrical, mechanical, external services, and coordination packages.

Lighting and Sound Systems

Feature lighting, safety lighting, control systems, outdoor audio, event-ready sound points, and coordinated electrical interfaces.

Landscape Automation and IoT

Smart irrigation controllers, sensors, weather stations, lighting controls, pump and valve automation, monitoring, alerts, and BMS or IoT integration.

Outdoor Furniture

Benches, bins, bollards, planters, tables, loose furniture, fixed seating, wayfinding, and public realm accessories.

Landscape Structures

Shade structures, pergolas, gazebos, trellises, kiosks, screens, and custom landscape features.

Playgrounds, Parks, and Open Spaces

Playgrounds, fitness areas, parks, trails, sports fields, plazas, and family outdoor destinations.

Nursery and Tree Services

Nursery planning, tree supply, tree production, tree removal, tree relocation, palms, indoor plants, and planters.

STRUCTURES, LIGHTING, WATER, AND AUTOMATION

Landscape details should enhance the place without feeling temporary or intrusive.

DesertScape coordinates outdoor structures, feature lighting, sound interfaces, water features, furniture, and automation systems as part of the landscape experience and the long term maintenance plan.

Landscape Structures

Shade structures, pergolas, gazebos, trellises, kiosks, screens, custom features, finish coordination, anchoring, drainage, lighting, and maintenance access.

Lighting and Sound

Feature lighting, safety lighting, control systems, outdoor audio, event-ready sound points, and coordinated electrical interfaces.

Water Features

Fountains, water mirrors, cascades, ponds, pump rooms, filtration interfaces, testing, commissioning, and maintenance coordination.

Automation and IoT

Smart controllers, sensors, weather stations, valve automation, monitoring, alerts, and BMS or IoT integration for efficient operations.

SECTORS SERVED

Outdoor environments across public, commercial, residential, hospitality, infrastructure, nursery, sports, and maintenance settings.

Hospitality

Hotels, resorts, restaurants, arrival landscapes, pool areas, terraces, courtyards, and destination outdoor environments.

Residential and Compounds

Private residential landscapes, community outdoor areas, streetscapes, gardens, and family outdoor amenities.

Governmental Projects

Civic landscapes, institutional environments, public facilities, streetscapes, and urban improvement programs.

Entertainment and Sports

Entertainment districts, sports venues, event landscapes, outdoor recreation areas, and active public spaces.

Healthcare and Hospitals

Healing gardens, shaded pedestrian routes, entrances, courtyards, staff outdoor areas, and maintainable green assets.

Parks and Public Realm

Parks, plazas, open spaces, promenades, pedestrian corridors, playgrounds, furniture, lighting, and planting systems.

Commercial and Mixed Use

Retail, office, mixed use, destination developments, podium landscapes, entrances, roof gardens, and outdoor gathering spaces.

Mega Projects and Private Clients

Large programs, high end estates, private landscapes, premium materials, and long term maintenance.

CAPABILITY CONTEXTS

Project categories across Saudi Arabia.

Public Realm and Parks

Parks, plazas, streetscapes, civic landscapes, open spaces, planting, irrigation, hardscape, furniture, lighting, and handover support.

Hospitality and Private Resorts

Resorts, hotels, arrival landscapes, pool areas, courtyards, private estates, guest outdoor environments, and long term maintenance scope.

Residential and Compounds

Private residential landscapes, community outdoor areas, garden works, material schedules, planting palettes, irrigation systems, and maintenance models.

Commercial and Mixed Use

Retail, office, mixed use, frontage landscapes, podium areas, planters, surfacing, planting, lighting, and coordinated landscape delivery.

Sports and Play

Sports fields, playgrounds, recreation areas, safety surfacing, equipment coordination, lighting, irrigation, inspection, and maintenance planning.

Infrastructure Landscape

Road corridors, medians, roadside planting, irrigation networks, authority or contractor coordination, quantities, logistics, and delivery controls.

TEAM AND TECHNICAL OFFICE

Multidisciplinary delivery with local experience and technical control.

DesertScape Co is built around an in-house multidisciplinary team with strong local Saudi experience and international project exposure.

Our people come from engineering, technical, landscape, construction, operations, and QHSE backgrounds, with hands-on experience in fast-track programs, complex site coordination, and high-standard project execution.

The team is supported by a capable technical office that manages drawings, specifications, quantities, planning, documentation, quality controls, and coordination from early project stages through handover and maintenance.

ASSETS AND MOBILIZATION

Field capability that supports dependable execution.

DesertScape Co operates with in-house machinery, equipment, trucks, vehicles, logistics resources, tools, and site support assets needed for reliable landscape delivery.

Assets are selected to be new or relatively new, maintained to project standards, and third-party certified where required, allowing the company to mobilize efficiently, control quality, and support projects with dependable field capability.

Logistics

Vehicles, trucks, equipment, tools, and project support resources for field delivery.

Control

More direct control over mobilization, maintenance, response, and project readiness.

Certification

Third-party certification where required for project compliance and safe operation.

Support

Site resources selected to support landscape works, civil interfaces, lighting, irrigation, and maintenance.

NURSERY, PALMS, TREES, AND PLANTING SUPPLY

Plant material is a project asset, not an afterthought.

DesertScape supports nursery planning, tree supply, tree production, tree removal, tree relocation, palms, indoor plants, and planters.

The service helps align species selection, quantities, procurement timing, site logistics, establishment periods, survival review, and long term maintenance expectations.

Supply

Trees, palms, shrubs, groundcovers, turf, indoor plants, planters, and seasonal planting.

Planning

Species, sizes, quantities, availability, lead times, transport, storage, and installation sequencing.

Relocation

Tree and palm removal, relocation planning, protection, lifting, transport, replanting, and establishment care.

Aftercare

Irrigation tuning, plant health monitoring, pest control, pruning, replacement planning, and reporting.

LANDSCAPE AUTOMATION AND IOT

Technology should protect the landscape without disturbing the experience.

Automation and IoT systems are planned as back-of-house technical infrastructure wherever possible, giving operation teams visibility and control while keeping premium outdoor areas clean and unobtrusive.

Scope can include smart irrigation controllers, sensors, weather stations, lighting controls, pump and valve automation, monitoring, alerts, and BMS or IoT integration.

Control Cabinets

Technical rooms, back-of-house doors, control cabinets, conduits, valve boxes, and maintenance access.

Smart Irrigation

Weather-based scheduling, flow awareness, valve automation, tuning, and abnormal-condition alerts.

Monitoring

Sensor placement, alert logic, remote visibility, operation routines, and handover documentation.

Integration

Coordination with BMS platforms, lighting controls, pumps, valves, and long term maintenance teams.

OPERATION AND MAINTENANCE

Maintenance begins before handover.

Operation and maintenance can be planned as a standalone service or as part of a design, supply, and construction package to protect the landscape after opening.

The service structure can cover preventive and corrective maintenance, irrigation tuning, seasonal planting, pruning, pest control, plant health, inspection routines, service level reporting, and upgrade planning for aging outdoor assets.

Preventive Care

Regular routines for irrigation, planting, pruning, fertilization, cleaning, pest management, and asset condition.

Performance

Plant health, water efficiency, response time, replacement planning, inspection records, and reporting.

Corrective Works

Targeted repairs, replanting, system tuning, upgrades, and improvement works according to agreed scope.

Handover Continuity

Maintenance planning that keeps design intent, construction quality, and operations connected.

CERTIFICATES AND CLASSIFICATIONS

Structured to meet project expectations for quality, safety, environment, and contractor classification.

ISO 9001

Quality Management System

ISO 45001

Occupational Health and Safety Management System

ISO 14001

Environmental Management System

MOMRA

Classified 1 Landscape Contractor By MOMRA

Quality

Documentation, inspections, submittals, handover records, and controlled delivery processes.

QHSE

Safety, environmental awareness, site discipline, and operational planning suitable for active project environments.

CLIENTS AND PROJECT CONTEXTS

Trusted for demanding public, destination, residential, commercial, and private outdoor environments.

DesertScape is structured to support owners, developers, consultants, contractors, authorities, and private clients across Saudi Arabia.

Owners and Developers

Clear scope definition, procurement alignment, quality documentation, and maintainable delivery.

Consultants and Contractors

Design support, submittals, quantities, construction execution, and coordinated handover.

Private Clients

Premium landscape works with discretion, material care, and long term maintenance planning.
